

Quality Policy

Gastops is a leading provider of machinery monitoring, maintenance and control products and services that wishes to be known for excellence. Gastops maintains a cost effective and disciplined quality program which assures consistently high performance against standards of design, material and workmanship for all of our products and services. Gastops continuously improves our quality program to enhance customer satisfaction and meet applicable customer, statutory and regulatory requirements. Gastops maintains an open reporting culture and encourages all employees in the sharing of mistakes without fear of retribution. This culture element allows the organization to learn, develop and grow. Our quality program includes adherence to customer delivery schedules and responsiveness to all with whom we have relationships. Nothing less will serve our purpose.

A handwritten signature in black ink, appearing to read "S. Horning", is positioned above a horizontal line.
